

The Work of IMU and CEIC on Journals and Related Issues

John Ball

Oxford Centre for Nonlinear PDE, UK

The talk will summarize some contributions made by the International Mathematical Union and its Committee for Electronic Information and Communication concerning mathematics journals and related issues. In particular I will discuss the 2010 Current Best Practices for Journals document <http://www.mathunion.org/fileadmin/CEIC/bestpractice/bpfinal.pdf> and make some personal observations.
