

Dynamics of Mathematics Journals from 2000 to 2009

The characteristics of mathematics journal articles have changed dramatically over the last decade. I shall describe changes over the period 2000 to 2009 in the numbers of journal articles and in types of journals being published. The data encompass articles published by virtually all publishers worldwide as reflected in the data bases of *Mathematical Reviews*. I shall also report on a snapshot of the articles with publication year 2009 that appeared in one of the four primary research journals of the AMS.
